

Radoje Jezdic

Full stack web developer

Serbia | +381 65 541 84 76 | hello@radoje.dev | [GitHub](#) | [LinkedIn](#)

Frontend-focused full stack developer with 4+ years of experience shipping production web applications across event management, fintech, AI, and climate-tech domains. Built a real-time chat platform from scratch and an embeddable chatbot SDK deployed across multiple client platforms.

EXPERIENCE

Independent Contractor | 2025 - 2026 | Full Stack Developer | Full-Time

- Architected and shipped full-stack micro-applications for a large-scale event management platform serving thousands of concurrent users.
- Engineered a real-time chat application with WhatsApp-style architecture from scratch, including message delivery status, typing indicators, and media support.
- Built a comprehensive badge printing system end-to-end (React frontend + Go backend), replacing a manual process and reducing check-in time by an estimated 60%.
- Designed relational database schemas in PostgreSQL and executed data migrations across all micro-services with zero downtime.

Luccid.ai | Feb 2025 – Sep 2025 | Frontend Developer | Part-Time

- Developed an embeddable chatbot SDK using React and Redux, deployed across 5+ client platforms and used by thousands of end users.
- Built client-facing and internal analytics dashboards with Next.js and TailwindCSS, giving operations teams real-time visibility into chatbot performance.
- Reduced rendering overhead and improved UI responsiveness by refactoring component architecture and eliminating unnecessary re-renders.
- Collaborated with product, design, and backend teams to ship features on a two-week sprint cycle.

Sylva.ac | 2024 – 2025 | Frontend Developer | Full-Time

- Developed the core UI for a climate-tech platform using Vue (Quasar) and SCSS, building a library of reusable components adopted across multiple product teams.
- Improved application performance through iterative profiling and optimization, reducing initial load time and improving Lighthouse scores.
- Worked closely with UX designers to refine usability, contributing to measurably higher user engagement metrics.

Single.earth | 2021 – 2022 | Frontend Developer | Full-Time

- Developed fintech-grade interfaces using React, Redux, and Angular for a platform enabling carbon credit transactions.
- Translated Figma designs into pixel-perfect, accessible UI components, maintaining visual consistency across the product.
- Integrated frontend with backend services (Go + PostgreSQL), implementing KYC flows and data collection forms that processed user verifications.

Rutann.rs | 2021 – 2025 | Fullstack Developer | Part-Time

- Maintained and extended a production web application (React, TailwindCSS) for a Serbian web services company, resolving critical issues and shipping regular updates.
- Managed Linux server infrastructure, performed dependency upgrades, and contributed to CI/CD pipeline improvements that reduced deployment time.

SKILLS

Frontend: React, Next.js, Vue, Quasar, Angular, Redux, Vuex, TailwindCSS, SASS, Bootstrap

Backend & Database: Node.js, Go, PostgreSQL, REST APIs

Tools & Infrastructure: Git, GitHub, Linux server administration, CI/CD, Docker, Figma

Testing & Quality: Performance profiling, accessibility (WCAG), responsive design, cross-browser compatibility
